

FCAMPD Amplified RF InGaAs Photodetector

✧ Features

- Wide Bandwidth
- Incorporated Bias-T
- O/E Hybrid Integrated
- High Gain, Low Noise, Broadband
- SMA Connector

✧ Applications

- Radar Information Processing
- Electronic Warfare
- Antenna Measurement

✧ Introduce of FCAMPD

The FCAMPD is optoelectronic hybrid integrated by broadband InGaAs photodiode and low noise amplifier. The response wavelength of InGaAs PIN photodiode is 1000 to 1650nm. The RF gain of low noise amplifier is 20~30dB.

FCAMPD can provide the bandwidth of 1GHz , 2.5GHz or customization (maximum 5GHz) . The module operates on +5V supply voltages. The optical input port is a standard FC(face-contacted) fiber-optic connector. The RF output port is an SMA compatible connector matched by 50 ohm impedance .

FCAMPD weighs less than 25 grams.

ROHS 2.0 certificated .

✧ Precautions

- Be sure the fiber coupling facet is clean before connecting it to opto-circuit .
- RF interface and optical interface shall be covered with dust cap when not in use.
- The suitable ESD protection is required in storage, transportation and using .
